SOURCE Liao-shan Jih-pao, (Information requested.)GROWTH OF CHA-TZU-YAO COAL MINE

The Cha-tzu-yao Mine was reopened in August 1947. It has been equipped with a net of high-and low-tension lines and a machine shop and foundry. The main problem was water in the large pits. Two 75-hp pumps were installed in November 1947, and another in April 1948. By the end of June the water had dropped 82 meters. Eight shafts are now being worked with 280 tons per day output.
